

# Holistic Biologic Dentistry

Synergy Dental Center has a total health dentistry approach that will benefit your entire body, not just your teeth! We are a fluoride-free and metal-free office, and can remove any metal (amalgam) fillings that you currently have with the SMART approach, which keeps you safe from exposure to mercury. We also offer ceramic implants and IV Vitamin C.

HOURS: Mon, Tues & Thurs 7:30AM - 3:30PM  
Wed 10:00AM - 5:00PM | Fri By Appointment  
Closed Sat & Sun

## MINOR AUTOHEMO- THERAPY

*A unique treatment that can both  
detoxify and heal the body.*

## What is Minor Autohemotherapy?

MiAHT is an immune stimulant therapy, comparable to an “autovaccination.” In minor autohemotherapy under aseptic conditions, 2-5 ml of blood is drawn into a sterile, disposable syringe (already containing an ozone-oxygen mixture), then slowly reinjected intramuscularly.

## Benefits and Indications for MiAHT

MiAHT has numerous benefits related to our health. At Synergy Dental, we use it to restore the natural healing process by boosting the immune system. Other conditions that MiAHT can be used for include: Acne Vulgaris (common acne), seasonal allergies, chronic fatigue syndrome, fibromyalgia, acute and chronic infectious disease, viruses and fungi (hepatitis, herpetic infections, HIV-AIDS, herpes zoster, candida, and papillomavirus infections).\*

## What is Ozone?

Oxygen you breathe is present in the air as a pair of oxygen atoms. Ozone is composed of three oxygen atoms. The addition of the third oxygen molecule makes it a supercharged molecule with many medical properties.

*“I can’t believe I have not taken my allergy medicine since my second treatment for oral bacteria and MiAHT. Thank you Dr. Porter and staff.”*

— Danielle B.

## Medical Properties of Ozone

*Ozone has multiple properties, which account for why it works so well for many chronic and acute conditions.*

1. Ozone is a potent regulator of the immune system. This means that when the immune system is activated (autoimmunity), ozone will calm it down. Also, when the immune system is depleted (chronic infections, cancer, etc), ozone will stimulate it. This occurs by ozone’s unique interaction with white cells to release immune messengers called cytokines.
2. Ozone stimulates increased uptake of oxygen.
3. Ozone improves circulation. It does this by improving the flow characteristic of blood as a liquid. Many patients with chronic inflammatory conditions will have impaired circulation.
4. Ozone increases antioxidant protection. Most patients with chronic illness have depleted antioxidant capability.
5. Ozone is a powerful mitochondrial stimulant. The mitochondria are the energy source for every cell in your body. The fundamental cause behind all chronic illness from diabetes, heart disease, cancer, chronic fatigue, etc. is decreased mitochondrial energy production.
